

HUP

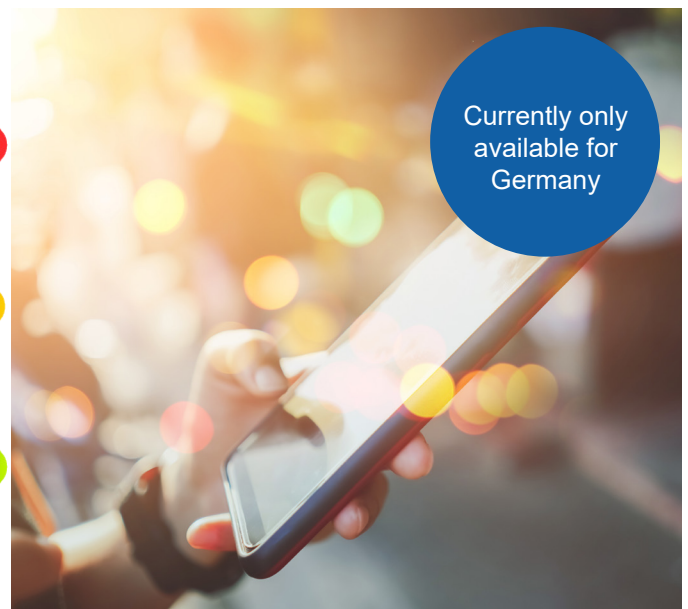

Distribution quality assurance through registration and deregistration of delivery staff

Distribution districts - always up to date

HUP VQS-Online is a live status monitoring of your distribution districts. In your personal area of the portal www.vqs-online.de you can see the status of your distribution districts at any time. From now on, there is no longer any doubt as to whether a distribution has already been **successfully completed**, **has not even been started yet**, or whether there may be **a current problem during distribution**.

Status reporting - optimize without wasting time

According to the number of areas to be monitored, you receive a call number block that contains both area identifiers and status information. The delivery person simply stores the VQS online phone numbers of his or her territory(ies) in his or her cell phone and uses these **FREE** of charge for the following status messages:

Try it out for free

The status messages are structured at www.vqs-online.de in your personal area by different coloring of the distribution areas - this display is almost without time delay. On the portal you will find free sample call numbers. In the area for which you have called, the status change is displayed directly. It's that simple.

**We will help you to
further increase your
delivery quality!**

**We look forward to
your call at:
+49 531 281 810**

VQS-Online at a glance:

- No investment in hardware/software
- No additional technical requirements for your hardware/software
- No dependence on your sales software
- Low, monthly usage fees depending on the monitored areas
- Very simple operation and therefore no training period
- Telephone numbers are provided by VQS-Online
- Technical handling of incoming calls takes place in the data center and does not burden your company's system landscape
